SOURCES OF PERSONAL INCOME

Personal income rose \$29.6 billion (annual rate) in March, following a rise of \$22.2 billion in February. The changes reflect several special factors: Profit-sharing payments to employees in the motor vehicle industry and a large increase in retroactive social security benefit payments affected the March change; subsidy payments to farmers affected both the March and February changes. Excluding these special factors, personal income increased \$8.9 billion in March and \$18.7 billion in February.

¹ Includes all full- and part-time wage and salary workers in nonagricultural establishments who received pay for any part of the pay period which includes the 12th of the month. Excludes proprietors, self-employed persons, domestic servants, and personnel of the Armed Forces. Total derived from this table not comparable with estimates of nonagricultural employment of the civilian labor force, shown on p. 11, which include proprietors, self-employed persons, and domestic servants; which count persons as employed when they are not at work because of industrial disputes, bad weather, etc., even if they are not paid for the time off; and which are based on a sample of the working-age population, whereas the estimates in this table are based on reports from employing establishments.

² Includes mining, not shown separately.

¹ Output refers to gross domestic product originating in the sector in 1987 dollars.

² Hours of all persons engaged in the sector, including hours of proprietors and unpaid family workers. Estimates based primarily on establishment data.

³ Wages and salaries of employees plus employers' contributions for social insurance and private benefit plans. Also includes an estimate of wages, salaries, and supplemental payments for the self-employed.

⁴ Hourly compensation divided by the consumer price index for all urban consumers.

⁵ Current dollar gross domestic product divided by constant dollar gross domestic product.

NOTE.—Data relate to all persons engaged in the sector.

Percent changes are from preceding period and are based on original data; they therefore may differ slightly from percent changes based on indexes shown here.

NOTE.—Beginning with data for January 1988, the reference base was changed from 1967 = 100

to 1982-84 = 100.

Data beginning 1983 incorporate a rental equivalence measure for homeownership costs and therefore are not strictly comparable with figures for earlier periods.

Data beginning 1987 and 1988 calculated on a revised basis.

¹ Data are provided averages of Wednesday figures for domestically chartered banks and savings of month-end data for foreign-related institutions. Data beginning January 1984 are not strictly comparable with data for earlier periods, largely because beginning January 1984 certain obligations of States and political subdivisions are included in loans rather than in other securities.

² Excludes loans to commercial banks in the United States.

³ Data are averages of daily figures.

¹ Department of Defense Military Assistance Program grant-aid shipments are excluded through 1984 and for revised statistical month data for 1985-86; they are included for statistical month data for 1985-86 and for 1987-88.

² Adjusted to include underreported exports to Canada.

³ Total includes commodities and transactions not classified according to kind. For exports data beginning 1987, these include underreported exports to Canada.

⁴ Total arrivals of imported goods other than transit shipments.

⁵ Revised statistical month exports less statistical month customs value imports.

NOTE.—Data shown include trade of the U.S. Virgin Islands.

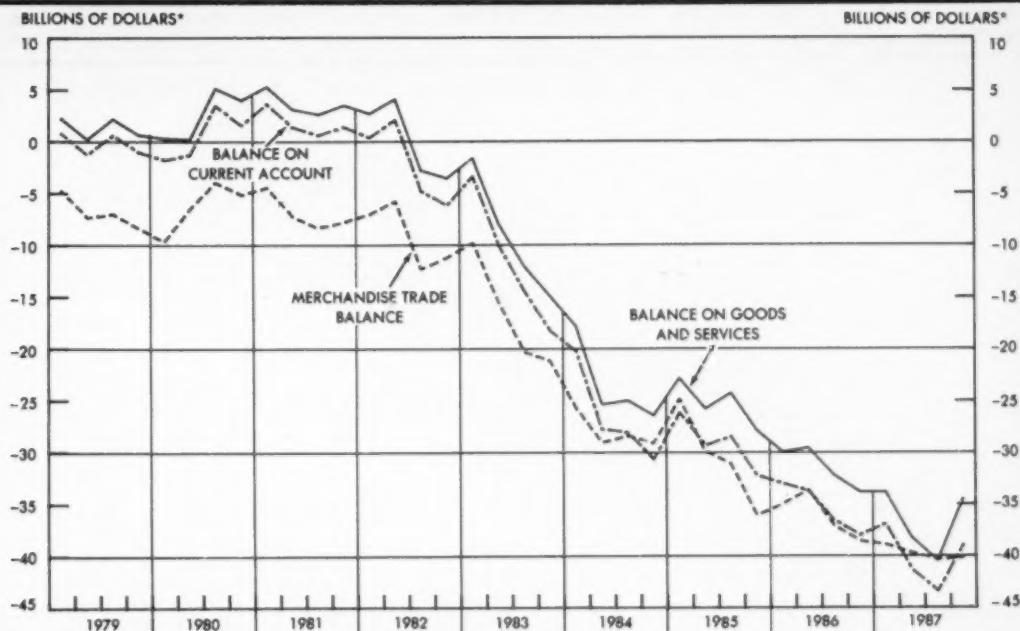

Statistical month and revised statistical month refer only to data for 1984-86. Data for 1987-88 are roughly equivalent to revised statistical month data.
